Who We Are

JWF Technologies is a specialized distributor servicing customers who require engineered solutions for ergonomic motion control, as well as hydraulic and pneumatic systems and components. As a stocking distributor with locations in Cincinnati (Headquarters), Cleveland and Detroit we are able to provide our customers with timely design assistance and shipment of their finished product.

Design & Engineering

With over 35 years of experience in the industry, we have learned the value of customer service. This is why we have become a complete systems design and integrator resource. We design custom packages to meet each customer's specific needs to reduce cost, decrease assembly time and increase reliability. With our proprietary "Einbau" design software, we can customize gas springs to meet all of your functionality needs and ensure ergonomically safe results per any specification. We provide engineering data with each design in order to help you locate and install custom designed product.

Our Mission

Our Mission is "Simply to be the best at what we do". Our goal is to become a sustaining resource to our customers and provide value-added services to make our customers more efficient and competitive in their industries.

Value-Added Services

- Bar-Coding
- Kitting
- Custom Packaging
- Returnable Containers
- Assembly
- Custom Part Numbering & Labeling
- Dock-To-Stock
- Just-In-Time
- Custom Labeling
